## Switching as a Function of Position

1. If the motion of the interrupter flag is vertical(perpendicular to the horizontal aperture slot) then the output must switch between approximately -0.25 to +0.25mm with respect to the optical axis.
2. If the motion of the interrupter flag is horizontal(parallel to the horizontal aperture slot) then the output must switch between approximately -0.50 to +0.50mm with respect to the optical axis.

## Packaging

1. The part package contain the following information:
  - Symbol
  - Date Code
  - Lot Code
  - The words "RoHS Compliant"

## Cautions in Usage

1. Store and use where there is no exterior force that will cause change in shape.
2. Store and use where there is no Hydrogen Sulfide gas, or any other corrosive gas.
3. The bending or cutting of the lead should be done at room temperature, no force being applied on the package.
4. Solder the lead pin under conditions of the absolute maximum rating chart, and do not apply force on the lead pin after soldering.

## Guarantee Period and Scope

1. Period  
One year after delivery to the desired place.
2. Scope  
Replacement of products will be done, if any problems lie in our company's products.  
However, we are not liable for your damage by lack of caution.

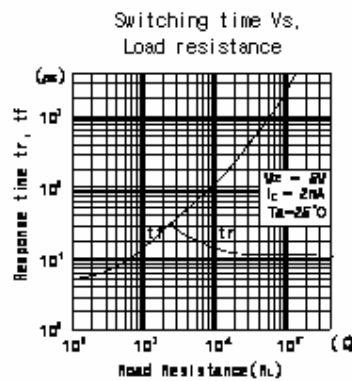

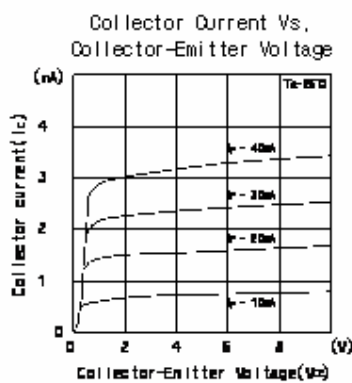

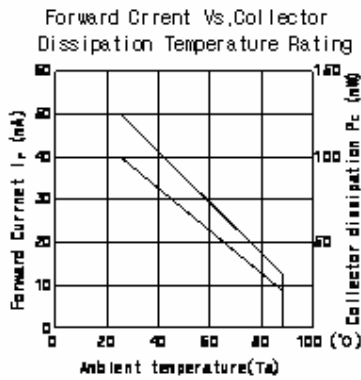

## Others

Any doubts concerning this specification should be discussed fully by both parties.
